

The UK's largest solar and energy storage exhibition returns to Birmingham this September

Solar & Storage Live UK 2025 will arrive at the NEC Birmingham from 23rd to 25th September, once again uniting more than 20,000 professionals from across the solar and energy storage value chain.

From installers and developers to EPCs, energy users, landowners, utilities and investors, the exhibition is a must-attend event. It's the perfect place to discover the latest solar technologies, find smart solutions for large-scale projects, grow your network and unlock new business and career opportunities.

Visitor registration is now open and attendance is free. Scan the QR code and get your free ticket today!

Discover ground-breaking solar and energy storage solutions

Occupying more than 40,000 m² of exhibition space, Solar & Storage Live UK 2025 will feature over 500 leading exhibitors from around the world. These industry pioneers will present the latest technologies, services and innovations that are reshaping the solar and energy storage landscape.

Confirmed exhibitors include GivEnergy, Alpha ESS, Anker SOLIX, BYD, DAS Solar, EcoFlow, Ethical Power, Fox ESS, GoodWe, GSE

Intégration, Huawei, JA Solar, Jinko Solar, LONGi, Segen, Sigenergy, SolarEdge, Solarport, SolaX Power, Solis, Sungrow, Sunsink, Tesla, Trina Solar and Van der Valk, with more on the list.

The exhibition will feature a wide range of products and services. Highlights include battery and energy storage systems, PV modules, components and mounting systems. PV balance of systems and solar thermal technologies will also be on display. Visitors can explore solutions in engineering, procurement and construction (EPC), along with operations and maintenance (O&M) and installation services. The event will also cover training and recruitment. Utilities and distributed network operators (DNOs) will be represented. Advisory, financing and other professional services will round out the offering.

This wide scope ensures that every part of the solar and energy storage supply chain is represented, from upstream innovation to downstream deployment.

Gain insight from the industry's brightest minds

Complementing the exhibition, Solar & Storage Live UK 2025 will offer an extensive presentation programme featuring more than 250 speakers. Government officials, CEOs, innovators and experienced practitioners will share their perspectives on best practices, policy, finance, technology and market development, delivering critical insights to help you navigate the evolving solar and energy storage landscape.

The content will be delivered across four dedicated theatres:

Residential Theatre

This stream will focus on the residential solar sector, addressing the needs of installers, local authorities and homeowners. Key discussions will explore how to effectively scale residential adoption, with practical insights into funding mechanisms, community-driven initiatives and government support programmes.

Keynote/Utility-Scale Theatre

This theatre will examine major market trends and national energy strategies, with emphasis on policy frameworks, utility-scale deployment, corporate PPAs and infrastructure integration. Sessions will also explore emerging technologies, including AI-driven optimisation and hybrid solar-storage systems.

Commercial & Industrial Theatre

Here, you will hear how businesses across manufacturing, retail, healthcare, education and more are embedding solar into operations to cut costs and meet sustainability goals. Topics will include financing models, grid connection challenges, and planning pathways, supported by real-world case studies.

Storage Theatre

Storage plays a critical role in the adoption of solar energy. This theatre will focus on both residential and utility-scale applications. Sessions will address the latest in battery technologies, grid integration, safety measures and alternative storage methods such as thermal storage, compressed air systems and pumped hydro, all critical to achieving grid flexibility and renewable energy optimisation.

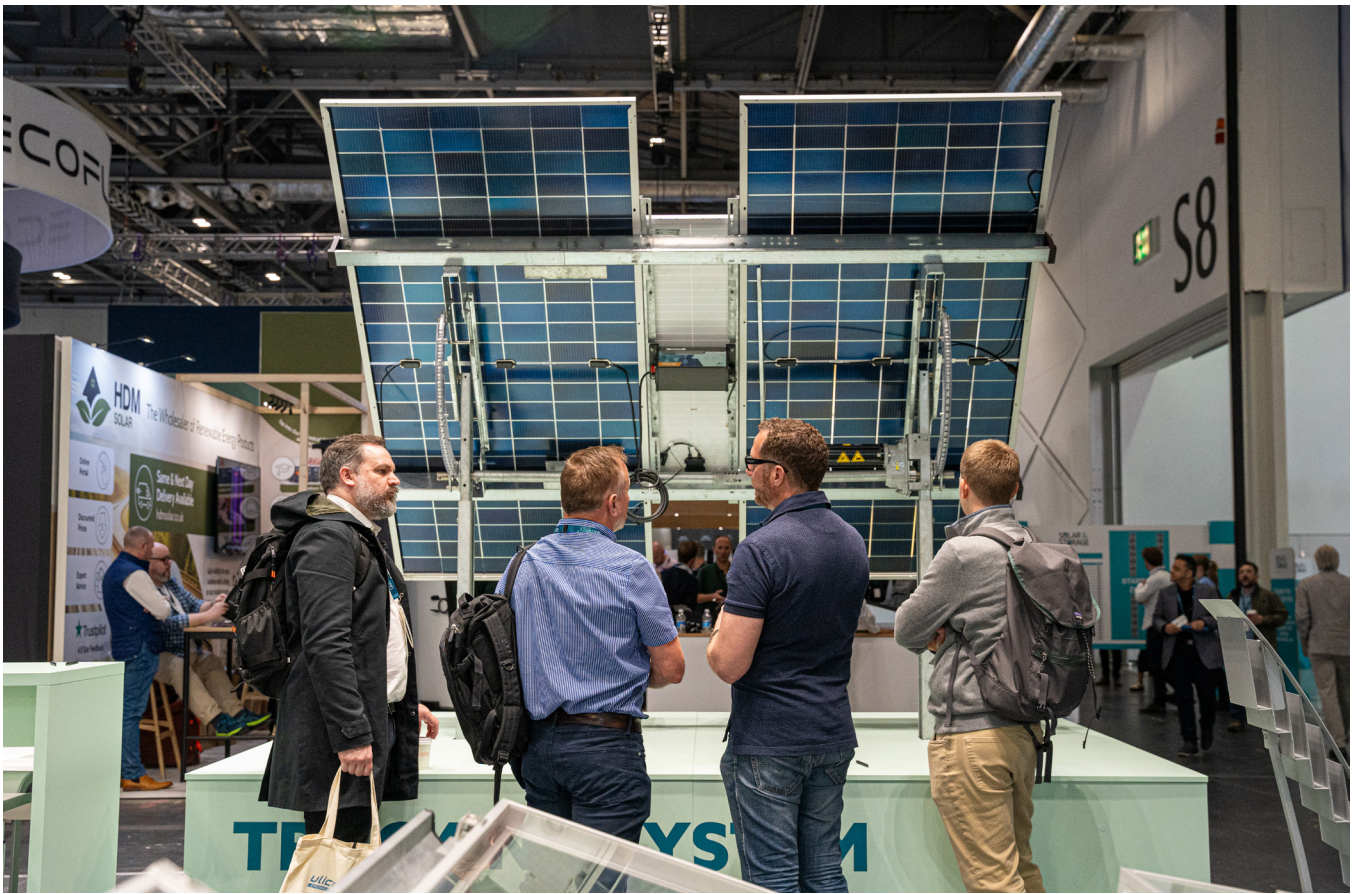

Show highlights not to be missed

Meet the Installers Zone

A dedicated space to explore a wide range of UK-based installers, ideal for commercial developers, industrial energy users and landowners seeking reliable project partners. Whether you're planning a rooftop installation or a full-scale ground mount system, the right expertise will be on hand.

Installer Training Hub

This hands-on training area will offer practical workshops covering solar PV module

installation, battery storage, mounting systems and inverter commissioning. Led by leading manufacturers and solution providers, the Hub is designed to help installers, contractors and end users stay current with the latest technologies and methods.

Start-ups Zone

Innovation is at the heart of the energy transition, and this zone will spotlight emerging companies introducing new

technologies, services and business models. It's an ideal space to meet future collaborators, discover breakthrough ideas or identify investment opportunities.

Recruitment Zone

With demand for skilled professionals rising, this area will showcase recruitment opportunities from across the industry. Whether you're an experienced engineer or looking to switch careers, you'll find

companies hiring for a broad range of roles and gain insight into evolving industry skill requirements. You will be able to book meetings with hiring businesses through the official event app when it goes live.

Networking events

You will have access to a full programme of informal and topic-led networking opportunities. These free-to-attend sessions offer the perfect platform to connect with senior decision-makers, potential clients, partners and peers from across the solar and energy storage landscape. Whether you're looking to grow your network or spark new collaborations, these events will help power your next breakthrough.

Register now for your free ticket

From pioneering technologies and product showcases to hands-on training, expert-led content, and networking and career-building opportunities, Solar & Storage Live UK 2025 is the definitive event for solar and energy storage professionals in the UK and beyond.

Register today for your free ticket and be part of the movement that is shaping the future of energy.
