

Ingeteam wins a new contract in the United Kingdom for the maintenance of 200 MW

- **Ingeteam strengthens its global leadership in the maintenance of Renewable Energy generation plants**
- **With this new contract in the United Kingdom, Ingeteam now has a contract portfolio of more than 12 GW of maintained power, securing its position as the global leader in the operation and maintenance of energy generation facilities**
- **The contract in the United Kingdom, with Iberdrola, involves the maintenance of two wind farms located in Scotland**
- **The company has been working in O&M since 1999 and is present in 22 countries across all 5 continents**

Zamudio, 22st November 2017. Ingeteam has won a new operation and maintenance contract for two wind farms in the United Kingdom. This is a key contract for Ingeteam, making it the company to hold the world record for maintained power. With contracts totaling more than 12 GW of maintained power throughout the world, Ingeteam has strengthened its position as the leading ISP (Independent Service Provider) of operation and maintenance services at energy generation plants.

This new contract with Iberdrola is to provide wind power operation and maintenance services for 200 MW at the Scottish wind farms of Harestanes and Mark Hill. As this is the first contract of this nature in Scotland, the company will open an office in the city of Glasgow for the supervision and coordination of the entire project.

Ingeteam has been working in O&M since 1999 and is present in 22 countries across all 5 continents

The company has been present in the United Kingdom since 2016, when it furthered its international expansion by starting up a subsidiary in the country with contracts in the PV and wind power sectors. Particular mention should be made of the supply of voltage

converters for three wind farms, Black Law, Hare Hill and Glen App, and substation automation solutions for Scottish Power Energy Networks.

Ingeteam

Ingeteam is a Group specializing in power and control electronics (inverters, frequency converters, controllers and protections), generators, motors, pumps, and electrical engineering and automation projects. The group completes its offer with operation & maintenance services.

Ingeteam develops its products for the following sectors: wind, PV, hydro and fossil fuel power generation; metal and mineral processing industry; marine; rail traction; power grid, including substations, always striving to optimize power generation, transmission, distribution and consumption.

The company operates throughout the world, employing 3,800 persons. R&D is the backbone of Ingeteam's business activity, in which 5% of the company's turnover is invested annually.
