Successful rights issue of Meyer Burger Technology Ltd – 99% of subscription rights exercised

Meyer Burger Technology Ltd (SIX Swiss Exchange: MBTN) announces today that 98.9% of the subscription rights have been exercised until the end of the subscription period on 22 July 2020, 12:00 CEST. In total, 1,272,465,688 new registered shares were offered to existing shareholders at a subscription price of CHF 0.09 per share. The 13,718,276 new registered shares to be issued, for which the subscription rights have not been exercised, will be sold on the market. The rights issue will thus generate gross proceeds of around CHF 115 million.

Prior to the capital increase, so-called PIPE investors (Private Investment in Public Equity) have committed themselves to subscribe for approximately 30% of the total number of new shares to be issued at a subscription price of CHF 0.09 per share, corresponding to gross proceeds of around CHF 50 million. With the completion of the capital increase, the company will thus receive gross proceeds totalling approx. CHF 165 million.

The first trading day of the new shares on SIX Swiss Exchange is scheduled for 29 July 2020. Delivery of the new shares against payment of the subscription price is also planned for 29 July 2020. The increased share capital of Meyer Burger will amount to CHF 125,757,560.30 divided into 2,515,151,206 registered shares with a nominal value of CHF 0.05 each.

Upon completion of the transaction, the conversion price of the outstanding convertible bond of Meyer Burger Technology Ltd (ISIN CH0253445131) will be adjusted in accordance with the bond terms. The conversion price will be reduced from CHF 0.98 per registered share to CHF 0.4863. Thus, the conversion ratio for bonds with denominations of CHF 5,000 each is increased from 5,102.04082 to 10,281.7191 registered shares of Meyer Burger Technology Ltd. All other terms remain unchanged.

The successful capital increase paves the way for Meyer Burger's transformation to a manufacturer of solar cells and solar modules. Production is to start in the first half of 2021 with 400 MW solar cells and 400 MW solar modules. An expansion of the production capacity up to 5 GW is planned by 2026. In this respect, letters of intent to purchase from potential customers in Europe and the USA have already been received in excess of 2 GW per year. Initially, solar modules are to be produced primarily for the attractive segment of roof top systems. The Board of Directors expects that the newly aligned Meyer Burger Group may be able to achieve an operating profit already with this production volume.
