

Cargostore Worldwide Announces Appointment of Operations Director Sharon Keverne

Cargostore Worldwide, London based global supplier of DNV and ISO certified containers and specialist equipment announces the appointment of Sharon Keverne to the newly created role of Operations Director.

Sharon brings with her 20+ years of valuable experience having worked in several companies across the oil and gas, shipping and freight forwarding industries. The most recent role as the Head of Operations at Allport Cargo Services, followed by Airfreight Manager at Alpi UK Ltd, and prior to that the Oil & Gas Manager at Panalpina World Transport.

Sharon will play a key role in the future growth of the company, following on from Cargostore's Secondary Management Buyout with private equity firm Connection Capital at the start of 2020.

Says Sharon Keverne *"I am really excited to join the Cargostore Team and assist with the shaping of their future growth. I feel very fortunate to be joining this team at this time."*

Justin Farrington Smith CEO of Cargostore Worldwide said: *"I am very pleased to welcome Sharon onboard and I look forward to working closely together. Sharon brings a wealth of experience to this role, which will be invaluable in our growth and development plans over the coming years."*

About Cargostore Worldwide:

Cargostore is one of the world's fastest growing suppliers of ISO shipping containers and DNV 2.7-1 certified CCU's for on and offshore projects. With offices in London and Abu Dhabi and depots across the globe, Cargostore prides itself on providing a seamless and fast service with the flexibility to meet any client requirement.

Cargostore's Intermodal Division supplies ISO certified storage and shipping containers for lease or sale and can offer bespoke container conversions and specialised equipment. The company supplies projects in stability, mining, aid, community development, large scale sporting events and general logistics.

The Offshore Division provides a complete range of Cargo Carrying Units (CCU's) to service the oil, gas and offshore renewables industries, project movers and offshore supply companies. All equipment is designed, built and certified to DNV 2.7 1 standard. The company has invested in a wide range of offshore CCUs and these are available via their location network in the US Gulf, the North Sea, the Arabian Gulf, Middle East, and East and West Africa.
