SMA America Showcases Utility Storage Solutions at Virtual ESA Conference & Expo
Solar Leader Empowers Attendees with Access to Integrated Storage Experts and Resources

ROCKLIN, Calif. – August 11, 2020 – SMA Solar Technology is pleased to join industry leaders at the [ESA Energy Storage Annual Virtual Conference & Expo](#) hosted online August 24–27, 2020.

As energy storage continues to gain market share in the United States, SMA is ready to showcase energy solutions in a virtual format. Video content and downloadable materials will be available in the SMA America booth on the conference website. The company will also have experts on hand virtually to discuss its solutions for integrating renewable energy into the grid as well as technologies for advanced grid support. Information will be featured about the company’s flexible service solutions for asset management, spanning from spare parts supply to preventative maintenance, plant-wide O&M and repowering solutions. With the simple click of a button, virtual attendees can initiate a conversation.

This year at ESA, SMA will collaborate with Dynapower, an industry leader in creating power electronics solutions. SMA and Dynapower will showcase several collaborations, including technology for both AC and DC coupled storage applications. Additionally, SMA will participate in a virtual education session with Dynapower to break down the merits of PV + storage solutions utilizing SMA’s Sunny Highpower PEAK3.

“Our team is excited and well-prepared to share expertise and information in this virtual format,” said Charles Ellis, vice president of sales with SMA America. “Our depth of experience with storage means we can provide highly customized solutions related to integrated storage, especially in the utility space.”

The SMA team will have sales and technical experts available by request to discuss key applications. As industrial-scale energy storage solutions have matured, utility-scale power plants can benefit from services that provide generation capacity and support grid stability. Attuned to that, SMA offers industry-leading technology for AC and DC coupled solutions to address both use cases.

SMA is a technical authority on storage and has long recognized that battery storage is essential to transforming to a fully decentralized energy supply based on renewable energy. Conference attendees who visit the SMA booth can learn more about SMA’s [Sunny Central Storage solution](#), the Sunny Central DC coupled storage solution and the [SMA DC-DC converter](#).

About SMA

As a leading global specialist in photovoltaic system technology, the SMA Group is setting the standards today for the decentralized and renewable energy supply of tomorrow. SMA’s portfolio contains a wide range of efficient PV inverters, holistic system solutions for PV systems of all power classes, intelligent energy management systems and battery-storage solutions as well as complete solutions for PV diesel hybrid applications. Digital energy services as well as extensive services up to and including operation and maintenance services for PV power plants round off SMA’s range. SMA inverters with a total output

of around 85 gigawatts have been installed in more than 190 countries worldwide. SMA's multi-award-winning technology is protected by more than 1,500 patents and utility models. Since 2008, the Group's parent company, SMA Solar Technology AG, has been listed on the Prime Standard of the Frankfurt Stock Exchange (S92) and is listed in the SDAX index.

Disclaimer:

This press release serves only as information and does not constitute an offer or invitation to subscribe to, acquire, hold or sell any securities of SMA Solar Technology AG (the "Company") or any present or future subsidiary of the Company (together with the Company, the "SMA Group"), nor should it form the basis of, or be relied upon in connection with, any contract to purchase or subscribe to any securities in the Company or any member of the SMA Group or commitment whatsoever. Securities may not be offered or sold in the United States of America absent registration or an exemption from registration under the U.S. Securities Act of 1933, as amended.

This press release may contain future-oriented statements. Future-oriented statements are statements that do not describe facts of the past. They also include statements about our assumptions and expectations. These statements are based on plans, estimations and forecasts that the Managing Board of SMA Solar Technology AG ("SMA" or "company") currently has available. Future-oriented statements are therefore only valid on the day on which they are made. By nature, future-oriented statements contain risks and elements of uncertainty. Various known and unknown risks, uncertainties, and other factors can lead to considerable differences between the actual results, the financial position, the development or the performance of the corporation, and the estimates given here. These factors include those that SMA has discussed in published reports. Such reports are available on the SMA website at www.SMA.de. The company accepts no obligation whatsoever to update these future-oriented statements or to adjust them to future events or developments.
