FOR IMMEDIATE RELEASE 25<sup>th</sup> AUGUST 2020

## ODE welcomes David Robertson as Business Line - Head of Renewables

*From left to right: David Robertson, Head of Renewables in company with Peter Godfrey, Chief Executive Officer, ODE Group Ltd*

International engineering, technical services and project management provider ODE, which as part of the DORIS Group leads the global renewables business line, is delighted to announce the addition of David Robertson to the company's management team.

Supporting ODE's London-Wimbledon corporate office and the new facility at The Exchange in Aberdeen, Mr Robertson will manage all aspects of the global Renewable's business. Mr Robertson with over fifteen years in the industry, is a known professional and accomplished business leader with demonstrable success in delivering offshore wind projects and in developing and securing new business opportunities. This experience includes working on both the developer and on the contractor sides of the business and geographically extends across involvement in the UK, Europe, Asia and North American offshore renewables markets.

ODE's offshore renewables experience commenced approximately 20 years ago, with the industry's UK inception, and the company has gained extensive knowledge and helped shape best practises through all phases of project developments ever since. This has been achieved either through technical and engineering support or through the provision of Owner's Engineering related services. The company's international activities continue to grow, with new contract announcements expected shortly, and the company's technical expertise extends from fixed to floating OWF solutions to an optimised mid-water depth articulated wind column (AWC) proprietary foundation. ODE now also provides direct in-house geotechnics support.

A DORIS Group Company

Peter Godfrey, CEO of ODE Group, said, “I am extremely pleased, at this point in our history, to be able to welcome David as our new Head of Renewables, to both strengthen and strategically lead, our worldwide development efforts. ODE continues to enhance our growing list of services and technical capabilities to support the offshore wind industry. David’s skills, experience and personal capabilities will be an integral part in this drive to further build on our robust portfolio, whilst we also maintain exceptional services and focus to our existing clients”

David Robertson, added “ODE has rightfully earned its reputation as a leading technical service provider to the global offshore wind sector, and I’m excited at the prospect to further build upon this. We have a tremendous opportunity to support the decarbonisation of the global power sector through renewables, whilst we continue to grow within our existing markets and to expand internationally. ODE will continue to bring strong business values, provide high quality service delivery and implement innovative technologies, such as deep water, to match the needs and high expectations of our clients. I’m therefore very glad to be part of a growing worldwide team, with a long track record, that is also delivery and customer focused.”

ENDS

#### About ODE

ODE (Offshore Design Engineering Limited) is an international technical service provider to the oil and gas and renewable energy markets. As part of the DORIS Group with over 55 years’ experience, ODE provides comprehensive consulting, engineering, procurement, project management and construction support services to its clients.

ODE’s head office is in Wimbledon, London, where it undertakes consultancy and engineering services for oil and gas and renewable projects. ODE also has a significant engineering presence in Great Yarmouth and Aberdeen. Internationally, ODE currently has project management offices for renewables in the United States, Taiwan, Japan and Vietnam.
