

CWind completes 2020 works at East Anglia ONE Windfarm

Chelmsford, Wednesday 4 November 2020.

CWind, part of the Global Marine Group, has completed this year's campaign as part of their East Anglia ONE Windfarm contract.

In 2019, CWind was awarded a multi-year contract with ScottishPower Renewables and Macquarie's Green Investment Group to provide below water services, including subsea inspections of the foundation jackets and offshore substation, any corrective maintenance requested, and pre-engineering studies at the offshore windfarm.

CWind, a leading provider of project engineering services, CTVs and training to the offshore wind industry, worked with Rovco, providers of ROV and hydrographic services, to carry out this year's campaign.

Nathanael Allison, Managing Director at CWind, said "We are pleased to share the successful completion of our 2020 campaign for ScottishPower Renewables and look forward to returning to East Anglia ONE, to provide our industry-leading subsea engineering services at the 102-turbine windfarm in 2021.

"This project calls on our extensive experience providing project services to the offshore wind industry since 2010 and supports our drive to grow our East Coast hub, further encouraging new employment opportunities both within CWind and throughout the supply chain with talent from the local area."

Charlie Jordan, East Anglia ONE Project Director at ScottishPower Renewables, said: "Working with an East Coast based contractor such as CWind highlights our commitment to working with local businesses on our current and future East Anglia windfarms.

"The importance of balance of plant work cannot be overstated and we trust in CWind's ability to continue providing a safe and efficient service so that we can remain operational, providing energy to up to 630,000 homes every year."

Registered No: 1708481. England - Registered Office:
New Saxon House, 1 Winsford Way, Boreham Interchange,
Chelmsford, Essex, CM2 5PD

This current contract is not the first awarded to a Global Marine Group company for the East Anglia ONE project. Beginning in 2016, CWind's sister companies, OceanIQ and Global Offshore, carried out desktop and route engineering studies, and pre-installation cable laying services to support the installation of the region's largest windfarm.

Located 43km off the coast of Lowestoft and Great Yarmouth, East Anglia ONE, a joint venture between ScottishPower Renewables and Macquarie's Green Investment Group (GIG), is a £2.5 billion project. It is the first of four offshore windfarms ScottishPower Renewables is developing in the region.

Notes to the Editor

About Global Marine Group

The Global Marine Group (GMG) is an innovative market leader in offshore engineering with an enviable track record of successful project execution. The Group consists of four business units; Global Marine providing fibre optic cable solutions to the telecommunications and oil & gas markets, CWind delivering a range of project services, CTVs and GWO-accredited training courses to the offshore wind industry, Global Offshore delivering cable installation, repair and trenching services to the offshore renewables, utilities and oil & gas markets and OceanIQ providing unparalleled subsea cable data, survey, route engineering, permitting and consultancy services for telecom and power cable installation projects.

GMG is uniquely positioned to support the diverse requirements of its global customer base via its ownership of one of the world's largest offshore support vessel fleets which includes three specialist cable installation and repair vessels, four maintenance vessels and 17 owned CTVs. The company is the longest operating marine services provider in the world with a history dating back to 1850. The Group boasts a number of industry achievements, from installing the first subsea cable between France and the UK, being part of the consortium that invented the subsea cable universal joint, and right through to today, finding solutions to combat global carbon emissions.

Most recently, the company was recognised for its innovative approach by being awarded with EEEGR's Marine Science & Technology Award 2019 for the PLP240 design and build as well as receiving the peer nominated Offshore Renewables Award at Offshore Support Journal Awards 2020 for the design of the fuel efficient Hybrid SES.

The Group is recognised for its global presence with successful joint ventures in China and Taiwan and aspires to achieve its vision 'Engineering a clean and connected future'.

Global Marine Group is a portfolio company of J.F. Lehman & Company, a leading middle-market private equity firm focused exclusively on the aerospace, defence, maritime, government and environmental sectors.
