

- Order intake for 2020 almost on a par with the previous year despite coronavirus pandemic
- Delta4000 series share of all orders increases to 81 percent for the full year
- Fourth quarter orders total 2.3 gigawatts, making it the strongest quarter in the financial year ended

**Hamburg, 15 January 2021.** Driven by strong demand seen towards the end of the year, the Nordex Group secured orders for 491 wind turbine systems with a total output of 2,261 megawatts (MW) in the fourth quarter of 2020 (Q4 2019: 1,477 MW). In 2020, the company received firm orders for a total of 1,331 wind turbines with an output of 6,020 MW, almost matching the high order intake of the previous year despite occasional delays caused by the coronavirus pandemic (2019: 6,207 MW). The share attributable to the efficient and high-margin Delta4000 wind turbines increased to 81 percent for the full year (2019: 44 percent). Launched only in 2019, the N163/5.X turbine alone accounted for 877 MW of new orders.

### **Order intake in the fourth quarter of 2020**

In the final quarter of 2020, 49 percent of orders were placed in Europe and 28 percent in the USA (North America region). The Latin America region had a share of 23 percent due to the 518 MW "Ventos de Santa Eugenia" project in Brazil. The Delta4000 series accounted for 81 percent of orders in the fourth quarter (Q4 2019: 56 percent).
