

**Hamburg, 10 February 2021.** The Nordex Group has again received an order from its regular customer Enel Green Power, a subsidiary of Enel S.p.A., comprising seven N133 turbines for a wind farm in Italy. The turbines will be installed at a 30 MW wind farm in the Basilicata region in the south of the country. The contract also includes a service contract of the turbines for an initial two-year contract.

The construction and completion of the wind farm will take place at the beginning of 2022.

In 2020, the Nordex Group installed a capacity of 41 MW in three projects in Italy, and is currently installing 65 MW beside of this new contract in other three projects in 2021 and 2022.

### **Enel Green Power**

Enel Green Power, within the Enel Group, is dedicated to the development and operation of renewables across the world, with a presence in Europe, the Americas, Asia, Africa and Oceania. Enel Green Power is a global leader in the green energy sector with an installed capacity of around 49 GW across a generation mix that includes wind, solar, geothermal and hydropower, and is at the forefront of integrating innovative technologies into renewable power plants.
