

## **European service continues under AlsoEnergy GmbH with strengthened solutions portfolio and enhanced regional expertise**

Berlin, March 1, 2021. AlsoEnergy, a global leader in technology solutions for renewable energy systems, announced today that skytron energy has been officially rebranded in Europe and Asia as AlsoEnergy GmbH and AlsoEnergy Japan K.K respectively. This name change completes the integration of skytron energy into AlsoEnergy's global organization of regional sales, support, and service business groups.

"This move establishes a unified network combining our global solution portfolio with our sales, services and support resources around the world," said Bob Schaefer, Chief Executive Officer of AlsoEnergy. "AlsoEnergy is increasing our investment in regional experts to ensure each of our customers consistently achieves the highest value with us across all geographies."

In EMEA, AlsoEnergy continues to fill the traditional market position of skytron energy, offering onsite solutions for monitoring and control of PV plants and large rooftop systems. These solutions include complete on-site hardware systems and engineering services based on the combined experience and IP of AlsoEnergy and skytron energy. Solutions are complemented by AlsoEnergy's industry leading PowerTrack Platform for cloud-based PV system monitoring.
