

Don't miss Floating Offshore Wind 2021 to discover everything at the very cutting-edge of the sector!

Organised by RenewableUK and Scottish Renewables, this established event is in its fifth year and will include essential updates in a crucial year of auctions and announcements through an exciting mix of live and virtual experiences. It will be the perfect platform from which to be inspired, to gain crucial market insight and to network with a vast array of professionals from across the industry. Event Partners include Aker Solutions, Equinor, Offshore Renewable Energy Catapult, OW Ocean Winds, RWE and Shell.

Held on 15-16 September in Aberdeen, the hybrid event will evaluate the global floating wind market, highlighting the unique challenges faced in ramping up development to meet the challenge of >1GW by 2050. There will be details of special reports, exclusive intelligence and professional publications to explore, as well as the chance to engage with colleagues and innovative trailblazers in floating offshore wind.
