

Hamburg, 6 July 2021. The Nordex Group has closed the second quarter of 2021 with an order intake of 1,534.1 MW (Q2 2020: 888 MW). The intake of firm orders in the Projects segment (excluding the service business) reached a volume of 2,781.6 MW in the first half of 2021 (H1 2020: 2,531.9 MW).

From April to June 2021, customers ordered a total of 297 wind turbines for projects in nine countries. Europe accounted for about 54 percent of the order intake in the second quarter, Latin America about 46 percent. The strongest individual markets in Europe were Finland, Germany, the Netherlands and Spain, with regard to Latin America two high-volume orders came from Brazil.

On the product side, new business in the second quarter again largely focussed on the various turbine types of the Delta4000 series with around 89 percent of the total order intake (in MW). In the first half of 2021, the share was around 82 percent overall (H1 2020: 79 percent).
