## HEAVY LIFT

### Lifting Management & Assurance

Ellevo Heavy Lift specialise in Lifting Management and Assurance services, providing our clients with expert and impartial advice, completely free from bias, ensuring there is no conflict of interest. Lifting Assurance on a project is a key fundamental when maintaining safety, quality and compliance.

Our team of consultants have the industry knowledge and technical capabilities to perform detailed and robust due diligence on technical submissions.

Having gained a wealth of time-served experience in heavy lifting operations, our subject matter experts have the skills to target the technical conditions and due diligence requirements for all aspects of lifting operations which enables the delivery of decisive risk mitigation, whilst still optimising planning, resource and equipment.

We have the engineering expertise to assess our clients Lifting and Transport proposals to evaluate both commercial and technical feasibility.
