

## FOR IMMEDIATE RELEASE

### **GOLDBECK SOLAR Launches Operations & Maintenance Services, Leveraging Vast Experience in O&M Portfolio**

TORONTO, CANADA - GOLDBECK SOLAR proudly unveils its latest offering, the Solar Operations & Maintenance (O&M) Services, now available in North America. This strategic expansion underscores GOLDBECK SOLAR's commitment to advancing renewable energy solutions, ensuring sustained efficiency and reliability.

The O&M Services represent a comprehensive solution designed to support businesses in optimizing their solar energy investments. GOLDBECK SOLAR brings to the table:

**Extensive Expertise:** Bolstered by GOLDBECK SOLAR's group-level experience managing an O&M portfolio of 1.5 GW, our team of proficient technicians and engineers guarantees optimal performance and durability for your solar installations.

**Holistic Maintenance:** From routine checks to critical repairs, our suite of services caters comprehensively to every aspect of your system, fostering uninterrupted operations.

**Cutting-Edge Performance Optimization:** Real-time monitoring utilizing advanced technology preemptively identifying and addressing potential issues, safeguarding consistent energy production.

**Commitment to Sustainability:** Embracing eco-friendly materials and practices, our O&M services prioritize efficiency while aligning with environmentally conscious strategies.

**24/7 Responsiveness:** Acknowledging the time-sensitive nature of solar energy, our team remains available round-the-clock to promptly address any unforeseen challenges.

**Transparent Cost-Efficiency:** Competitive pricing structures with transparent billing ensure optimal value, amplifying returns on your solar investment.

**Tailored Customer Focus:** Collaborative engagement ensures personalized services aligned precisely with individual requirements, ensuring peak performance and client satisfaction.

GOLDBECK SOLAR invites businesses to explore the opportunity to optimize their solar energy investments with our newly launched Operations & Maintenance Services. [Contact our team today](#) to discover how our tailored O&M solutions can elevate your sustainable energy strategy.

### **About GOLDBECK SOLAR**

GOLDBECK SOLAR is an international company that specializes in the turnkey construction of commercial rooftop and ground-mounted photovoltaic systems, covering the entire value chain from project development to the direct sale of clean energy. With 22 years of experience in the optimization and construction of world-class solar power plants, the company is a driving force in various markets.

The North American subsidiary was founded in 2011 and has extensive expertise in engineering, constructing, and commissioning exceptional photovoltaic systems. One of their unique values is the integration of EPC services - often completed by their experienced construction team - with the supply of fixed or tracking substructures adapted to the technical and environmental requirements of the North American market. While optional, this vertical integration helps guarantee process reliability, execution quality, and increased efficiency resulting in high-performing solar assets.

GOLDBECK SOLAR has offices across the US and Canada and has over 200 MW of operational sites to date throughout Canada and the Northeast and Midwest United States. This positions them uniquely to serve clients throughout North America. In 2023, the company expects to double its installed capacity in the market to 400 MW.
